

ComfortPlus™

The Best of Both Worlds

ComfortPlus™ Combines the power of low-e thermal control with the benefits of laminate glass technology. Providing a thermal control product that is easy to work with, suitable for simple repairs or replacements, requires no toughening to comply as a safety glass and has near complete elimination of harmful UV rays.

ComfortPlus™ comes as a laminated product, making it an A-Grade safety glass already without the need for further toughening. We can cut process and provide edgework on ComfortPlus™ much the same as the rest of our glass range.

ComfortPlus™ is a trademark of Oceania Glass.

Applications

- Shop Fronts
- Skylights
- Large Skyscrapers
- Apartment Spaces
- New Homes
