

# QLam Hush™

## For a little peace and quiet

QLam Hush™ is a special suite of laminate glasses available through Highland Glass that offer improved acoustic performance when compared to standard monolithic or laminated glass. Suitable for places where the ambience and atmosphere for the environment is vital or just somewhere sound needs to be contained in or isolated from.

QLam Hush™ comes as a laminated product, making it an A-Grade safety glass already without the need for further toughening. We can cut process and provide edgework on QLam Hush™ much the same as the rest of our glass range.

*QLam Hush™ is a trademark of Oceania Glass.*
